- **160** babies die each day from tetanus 
- MNT has been eliminated from **20** countries since 2000 
- **3** doses of tetanus vaccine = immunity from tetanus 
- Woman + vaccine = protected baby 
- **US\$1.80** protects 1 mother and her future children 
- The Eliminate Project saves & protects **61 million** moms & babies 
- Elimination = **<1** case of MNT per 1,000 live births 

Campaign timeline

Figures are accurate as of April 2011 and are subject to change.

Kiwanis' commitment to eliminating Iodine Deficiency Disorders (IDD) – the world's leading preventive cause of mental and developmental disabilities – has been referred to by UNICEF officials as one of the greatest public health accomplishments of the past decade.

As a result of the IDD accomplishment, more than 80 million newborns now are protected each year from death, mental and physical disabilities, lethargy, and learning disabilities. The Kiwanis International Foundation's work is best exemplified in communities and regions worldwide through Kiwanis clubs, divisions and districts. By supporting this work, Kiwanis plays a significant role in addressing local and global needs.

Won't you step up to the plate and support the NEW International Foundation Eliminate Project?

I thank you in advance for your support during the next 5 years.
